

Stone Age Fire Pits

Stone Age offers a wide selection of fire pits for any setting. Simple, three to five piece construction greatly speeds up installations. All models feature extended base plates with molded feet, which may be used to allow movement after assembly or to create clearance and airflow under the unit, as required for installations on wooden structures, or the base may be positioned to place the feet inside the pit if not needed. Three round configurations are available, plus a square model, and optional extension kits to create a rectangular fire pit. Lining with firebrick is recommended for wood burning applications.
